The Office of Legal Services (OLS) is the primary legal support for the EMCBC and its client sites under the principal purview of Office of Environmental Management (EM). Some client sites have a specific EM mission but site operations are the principal responsibility of another Departmental Element (e.g., Science). The OLS is the primary legal support solely for the EM mission at those sites operated by another Departmental Element. For client sites with local (on-site) counsel from other Departmental Elements or another EM site Office of Chief Counsel, OLS is specifically a support function if requested by local counsel or as directed by Headquarters.
